## FIRE STATION SOLUTION

## LET OUR EXTREME SERIES DOORS TAKE CARE OF YOUR STATION

### A HIGH PERFORMANCE DOOR FOR HIGH PERFORMANCE FIRE STATIONS

Extreme Series Sectional Doors are designed performance-forward for your fire station. Built for speed, strength and style, it's made to get your crew out of the station and on the scene as fast as possible. The door clears the opening faster than conventional doors at an average speed of 24 inches per second. All Extreme Series Sectional Doors are powered by a direct-drive LiftMaster® motor with myQ® technology. Robust hardware and safety components extend your door's cycle life up to 100,000 cycles or more. Because your door should fit your station, a variety of window, color, design and performance options are available.

*For more information on these and other Clopay products, visit [clopaycommercial.com](http://clopaycommercial.com). Architects and specifiers, visit [architectdoorhelp.com](http://architectdoorhelp.com).*

**SPEED:** 3X faster  
(24 inches per second to open).\*

**EXTENDED CYCLE LIFE:** 10X longer  
(100,000 cycles)

**DURABILITY:** Advanced hardware and durable components increase the life of your door.

**RELIABILITY:** LiftMaster® motor with myQ® technology and floor-mounted controllers reduce the risk of damage to apparatus.

**CONTROL:** myQ® technology allows for more visibility and control.

\*When compared to a 10'x10' door with a Logic 5.0™ operator set to an average of 8" per second.
